## PROPOSAL

In the provided working file, the objects CORR1 and CORR2 are the same with which we have been working in the class.

Now, a new alignment AL3 has appeared. Its profile AL3-PROF has been defined into a new surface profile view called "view-prof-AL3".

AL3 is giving rise to a new roundabout CORR3. The proposal in this test is to solve the junction between the roundabout CORR3 and the corridor CORR1 so that this latter finishes at CORR3.
